

The Milky Way Galaxy

200 billion stars

Andromeda Galaxy

Sombrero Galaxy

The Sleeping Beauty Galaxy

A vast field of galaxies, including spiral, elliptical, and irregular shapes, scattered across a dark background. Some galaxies are bright and clear, while others are faint and distant. A few bright stars are also visible, including a prominent blue star in the lower left and a bright orange star in the lower center.

Galaxies!

3,000,000,000,000,000,000 stars!
(Three thousand million billion)

The Crab Nebula

The Horsehead Nebula

Hourglass Nebula

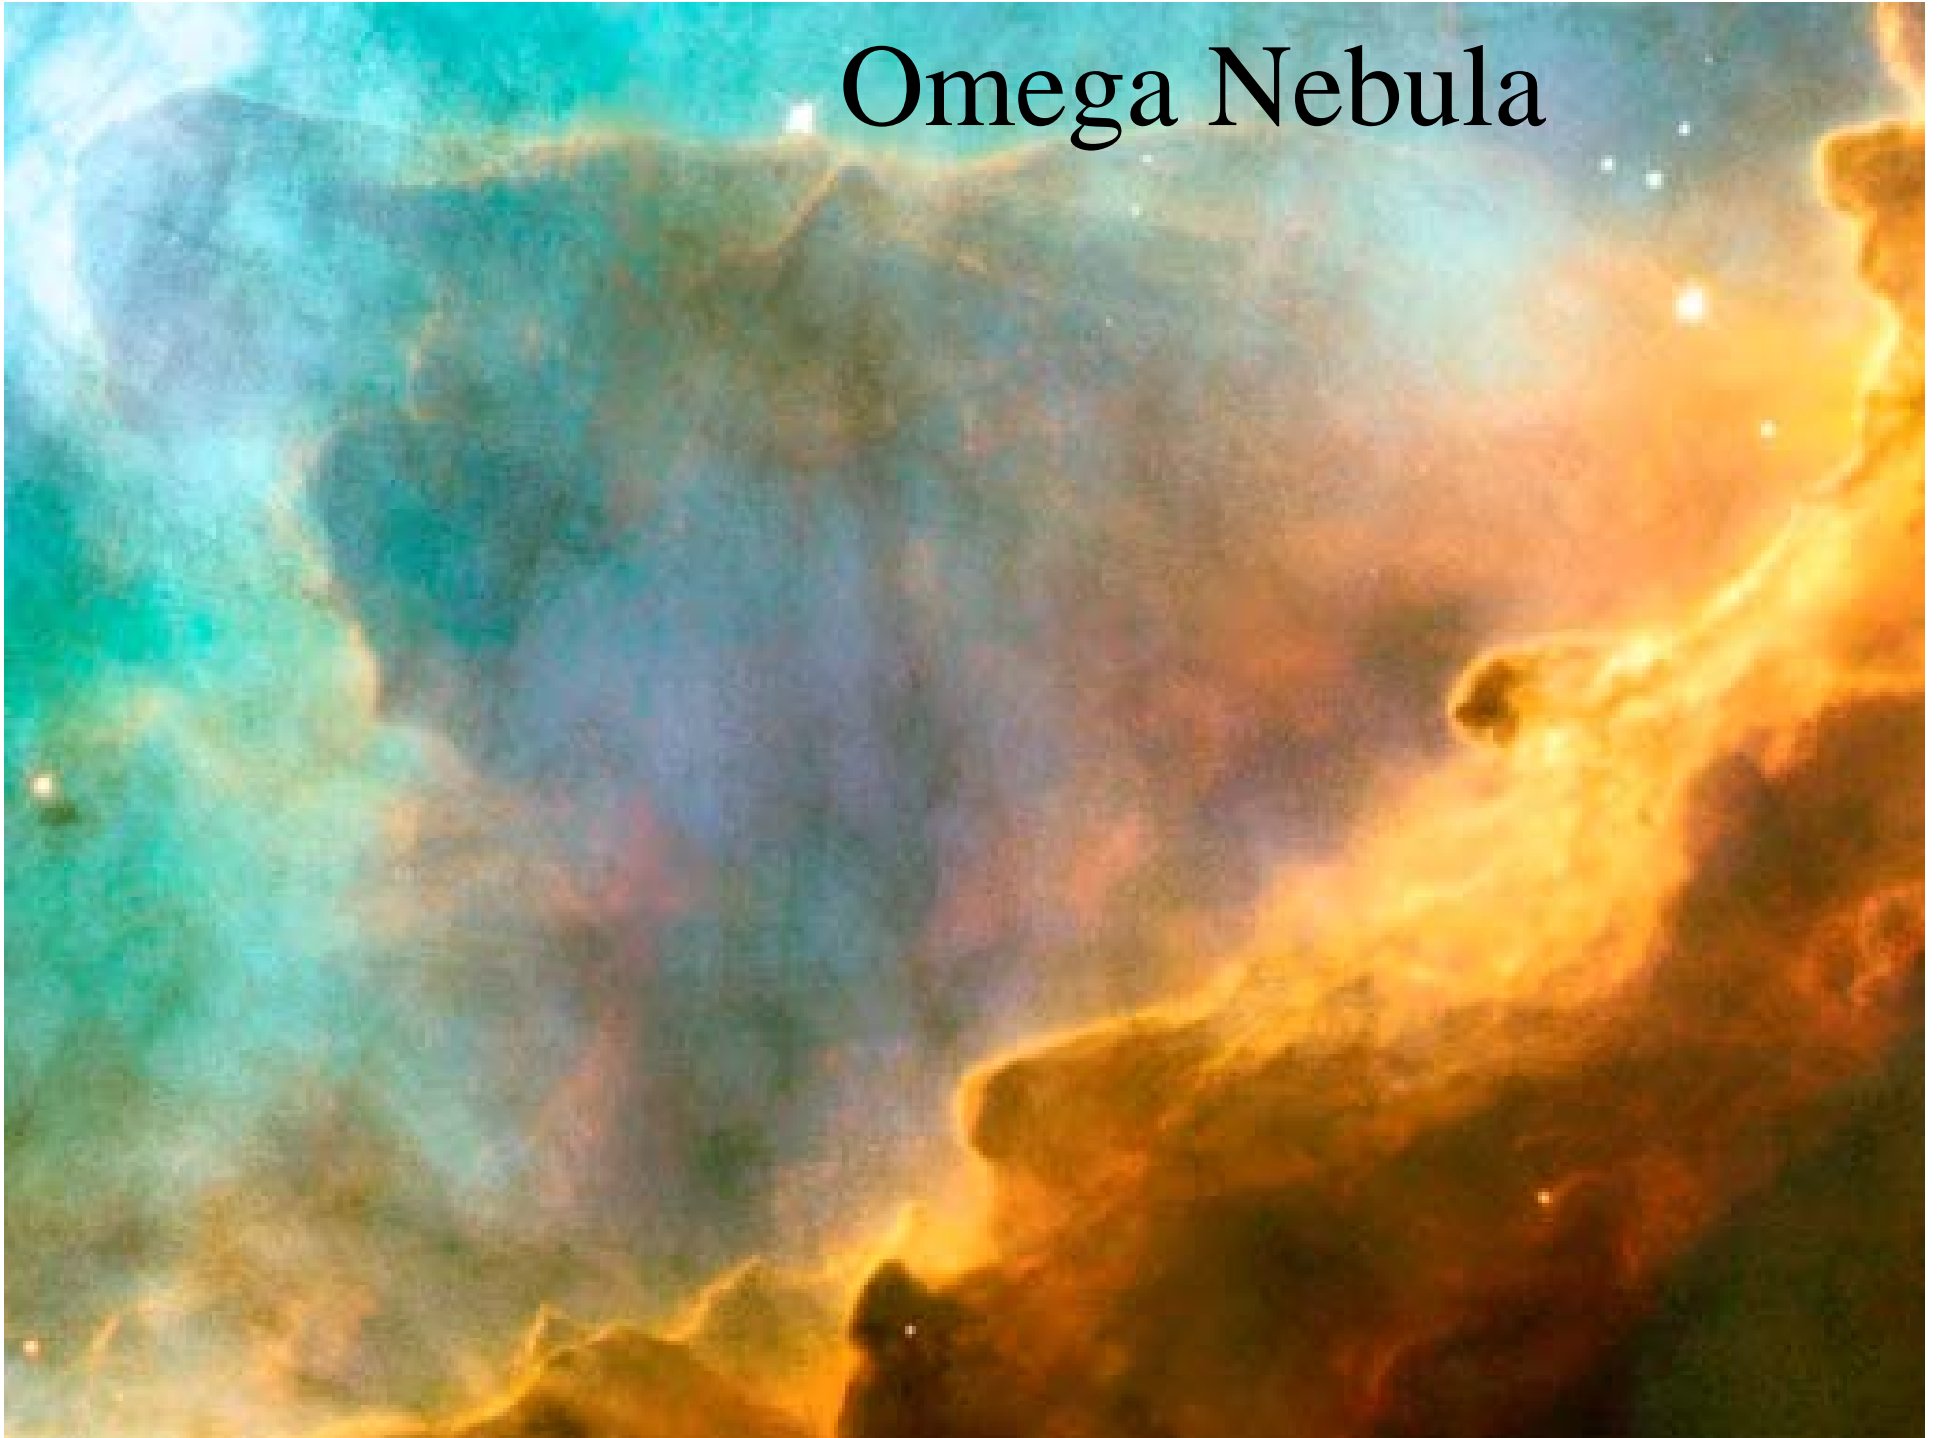

Eskimo Nebula

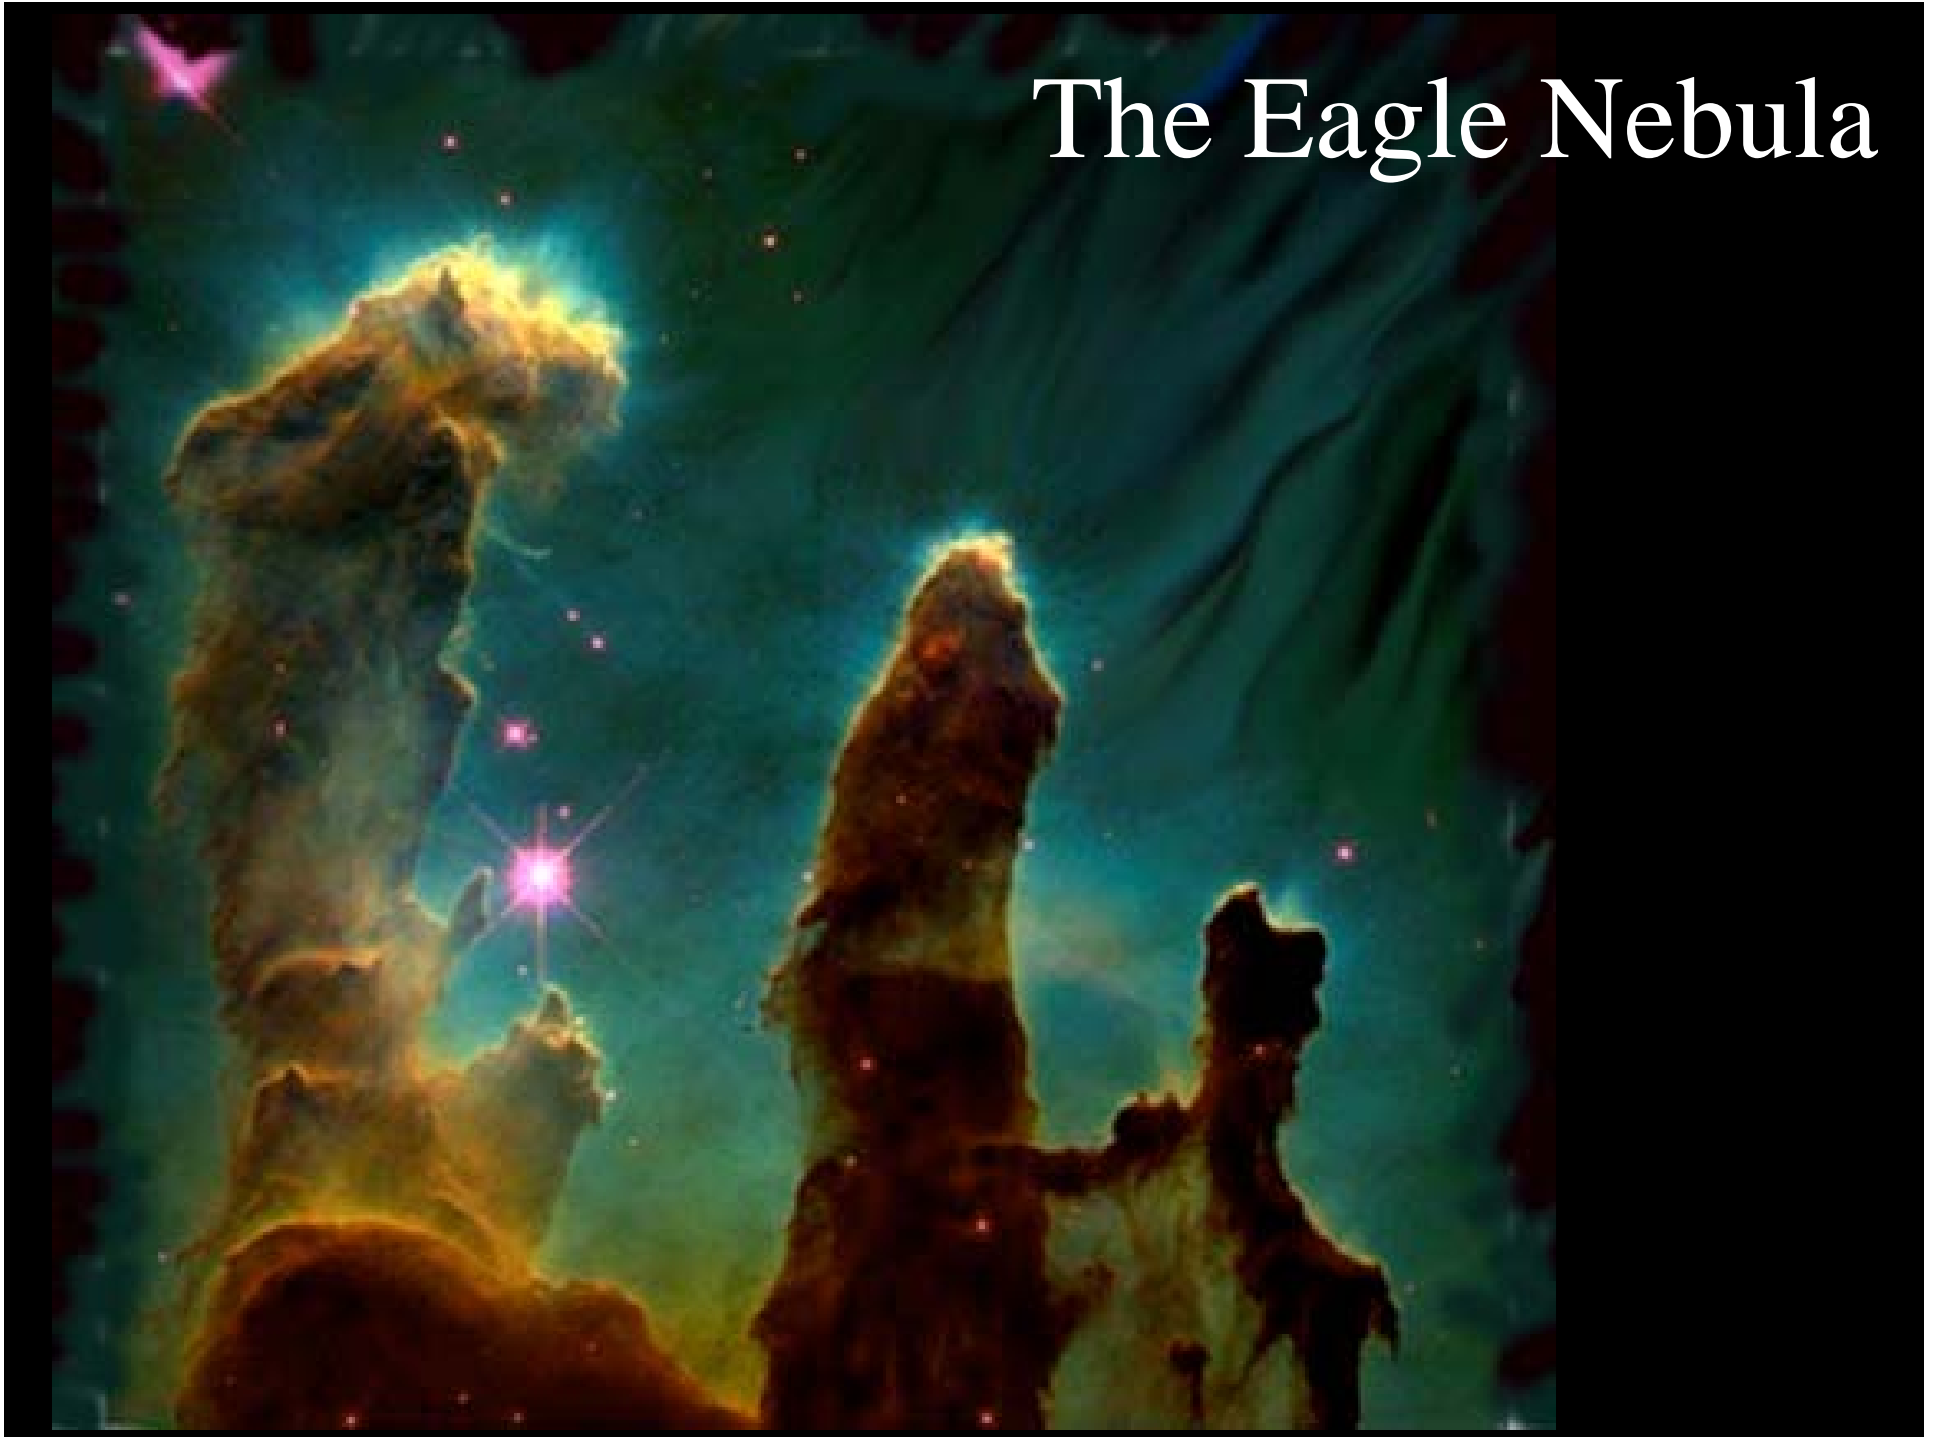

Bow Tie Nebula

Omega Nebula

The Eagle Nebula

A wide-field astronomical image of the Trifid Nebula, showing its characteristic three-lobed structure. The top lobe is a bright orange-red color, the middle lobe is a vibrant green, and the bottom lobe is a deep blue. The nebula is set against a dark background filled with numerous stars of various colors, including blue, white, and red. The text "Trifid Nebula" is overlaid in the bottom left corner in a white serif font.
